

the TYLER TIMES

TLPA "Science" Meeting

Welcome to early summer 2021 on Tyler Lake! We have some news and events to share with you:

Our first TLPA meeting of the summer is next **Saturday, June 12 at 10:00** at Camp Cochipianee.

This will be our annual "Science" meeting, where we talk about the Lake's water quality and weeds. We'll review last year's efforts, share information that we learned, and present our plans for this year. We will discuss:

- Developments with the State DEEP, the Town of Goshen and the other organizations and companies that we work with,
- Results of last year's water quality testing performed by New England Aquatic Research (NEAR, our Limnologist and scientific advisors),
- Specific weed remediation and water quality steps that we plan to enact ourselves, and with Solitude, our application specialists.

If it is good weather, we will hold the meeting outside. Bring chairs and water for your comfort. If unfavorable weather, we will move inside. If inside, everyone must wear a mask.

Everyone wants to know what's going on this year, especially since this is our first year "out" after the pandemic. At this meeting we will answer your questions about our water quality and weed remediation plans. **Plan to be there!**

FYI, the Annual Meeting ("Business") will be Saturday July 10, site to be determined.
